ONE PARTNER, ENGINEERING TO OPERATIONS

Apexa Energy Solutions LLC is an integrated energy solutions company established in the United Arab Emirates to support the evolving requirements of the energy and industrial sectors. We provide engineering, EPC, DBOM, operations & maintenance, commissioning, well and production services, equipment solutions, fabrication and specialized field support.

With strong UAE market knowledge and practical experience in challenging oil & gas operating environments, Apexa is positioned to support operators, EPC contractors and industrial clients with flexible and technically sound solutions.

Lifecycle stages covered

UAE

Based in Abu Dhabi

“Our strength lies in understanding both the engineering and operational sides of an asset. We focus not only on delivering projects, but also on ensuring that facilities operate safely, reliably and efficiently throughout their lifecycle.”

APEXA ENERGY SOLUTIONS

VISION

WHERE WE ARE GOING

To become one of the UAE's most trusted energy service companies, delivering safe, reliable and innovative engineering solutions.

MISSION

HOW WE GET THERE

To deliver high-quality engineering and operational solutions while creating long-term value for our clients through safety, reliability, efficiency and innovation.

SAFETY

Protecting people, assets, the environment and the communities in which we operate.

INTEGRITY

Conducting business transparently, ethically and responsibly.

EXCELLENCE

Maintaining high standards in engineering, execution, operations and service.

RELIABILITY

Designing and delivering solutions around availability, continuity and performance.

INNOVATION

Applying practical engineering and improved operating methods to enhance efficiency.

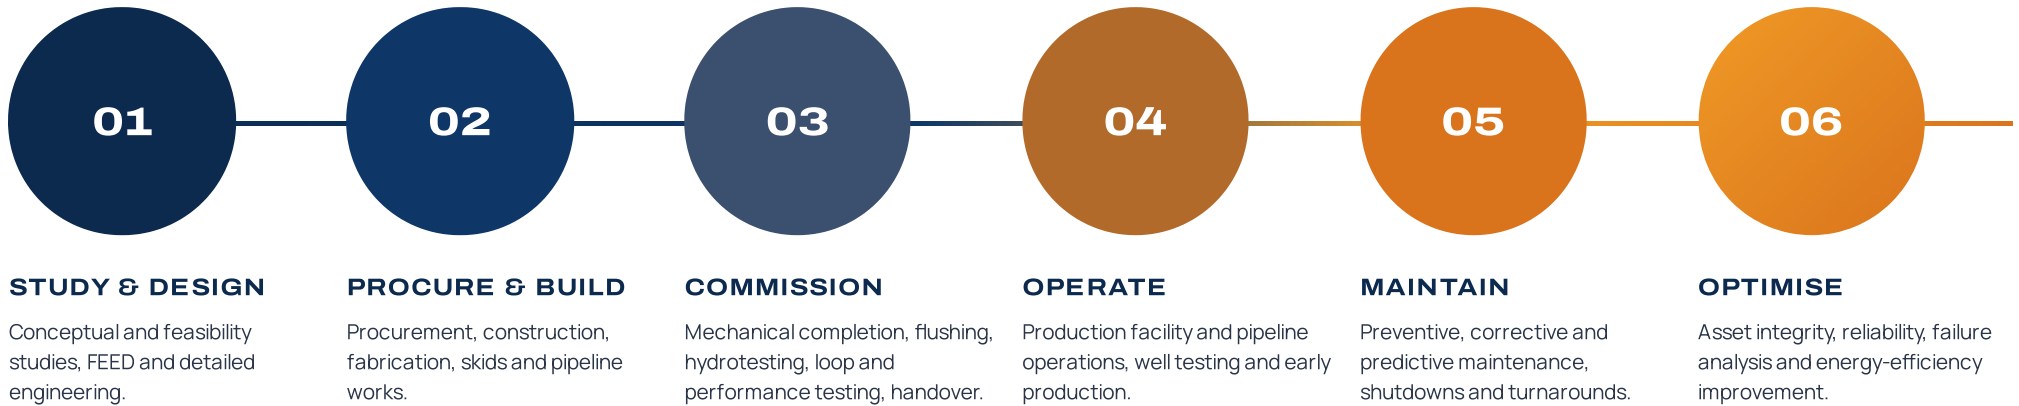

PARTNERSHIP

Building sustainable relationships with clients, suppliers and strategic partners.

ENGINEERING **TO** OPERATIONS

Apexa covers every stage of an asset, so the team that designs and builds a facility also understands how it has to run, safely, reliably and efficiently.

PROJECT DELIVERY

WHOLE-LIFE OPERATION

— OUR SERVICES

CORE CAPABILITIES

From the first study to daily production, delivered by one team.

01 ENGINEERING & EPC

Conceptual and feasibility studies, FEED and detailed engineering, procurement, construction, pre-commissioning, commissioning, start-up and project management.

02 DBOM

Design, Build, Operate & Maintain solutions for oil & gas production facilities, early production facilities, well facilities, produced-water systems, pumping and modular facilities.

03 OPERATIONS & MAINTENANCE

Production facility and pipeline operations, preventive, corrective and predictive maintenance, rotating equipment support, reliability improvement, maintenance planning and KPI management.

04 WELL & PRODUCTION SERVICES

Well testing, nitrogen lifting and inerting, flowback and production support, temporary and early production facilities, separation, metering, storage and flare systems.

— ON SITE

FIELD EXECUTION & OPTIMIZATION

Hands-on delivery at the facility: commissioning, packages, fabrication, shutdowns and integrity.

05

COMMISSIONING & START-UP

Commissioning planning, systemization, mechanical completion, punch-list, flushing, hydrotesting, drying, electrical & loop testing, control system testing, performance testing and handover.

06

EQUIPMENT & PACKAGE SOLUTIONS

Production and test separators, pumps and compressors, nitrogen packages, chemical injection, metering and filtration skids, storage tanks, flare systems, temporary production equipment and modular process skids.

07

FABRICATION & CONSTRUCTION

Process skids and piping, structural fabrication, tanks, supports and pipe racks, modular packages, mechanical and equipment installation, pipeline works, electrical and instrumentation installation and brownfield modifications.

08

SHUTDOWN & TURNAROUND

Shutdown planning, mechanical maintenance, equipment replacement, valve maintenance, pipeline modifications, electrical and instrumentation works, inspection and testing, reinstatement and start-up.

09

ASSET INTEGRITY & OPTIMIZATION

Asset condition assessment, reliability and maintenance optimization, equipment performance evaluation, failure analysis, energy-efficiency optimization, maintenance strategy, critical spare assessment and lifecycle planning.

WHERE WE WORK

02

ENERGY

Engineering, project execution and operational support for conventional and evolving energy infrastructure.

03

UTILITIES

Pumping, water, power and associated utility infrastructure.

04

INDUSTRIAL

Engineering, maintenance, equipment and operational solutions for industrial facilities.

SAFETY WITHOUT COMPROMISE

Health, Safety, Environment and Quality are integral to how Apexa conducts its business. Our objective is to execute every project without harm to people, damage to assets or adverse impact on the environment.

- LEADERSHIP COMMITMENT

- RISK ASSESSMENT

- PERMIT-TO-WORK COMPLIANCE

- COMPETENCY & TRAINING

- TOOLBOX TALKS

- STOP-WORK AUTHORITY

- INCIDENT PREVENTION

- ENVIRONMENTAL RESPONSIBILITY
